The first comprehensive handbook on homeopathic remedy relationships, this book provides lists of complementary, successive, and inimical remedies, antidotes, and collaterals. Data on interactions, duration of actions, foods to avoid, references to miasms, and practical tips on the use of remedies, supplement the book's content. A Druid's Herbal for the Sacred Earth Year Ellen Evert Hopman,1994-11-01 For the ancient Druids, the healing and magical properties of herbs were inseparable from the larger cycles of the seasons, the movements of the planets, and the progression of a human life. *A Druid's Herbal* shows the reader how to use herbs when creating rituals to celebrate festivals and significant life passages such as births, house blessings, weddings, funerals, and naming ceremonies. Drawing on extensive research and a deep personal experience with Pagan traditions, Ellen Evert Hopman explores the history and folklore surrounding the eight major Celtic festivals: Samhain, Winter Solstice, Imbolc, Spring Equinox, Beltaine, Summer Solstice, Lughnasad, and Fall Equinox. Included in each discussion are complete instructions on the medicinal and magical uses of the herbs associated with each celebration. Using these Celtic traditions as examples, the author suggests ways to incorporate the symbolic and magical power of herbs into personal rituals that honor all phases of life from childbirth to last rites. Also included are chapters on how to prepare herbal tinctures, salves, and poultices; herbs used by the Druids; herbal alchemy and the planets; and the relationships between herbs and sacred places. Filled with practical information and imaginative suggestions for using herbs for healing, ceremony, and magic, this book is an indispensable and comprehensive guide to age-old herbal practices.

Alternative Medicine for the Elderly P. Cherniack,N. Cherniack,2013-04-18 The explosion of information about complementary and alternative medicine (CAM) has demanded the attention of health professionals and responsible consumers, including the elderly. Increasingly, medical schools are providing education about CAM. This book brings together for academicians and interested mainstream practitioners much of the current information on CAM and its role in the health of the elderly. The individual chapters are thoroughly researched and quite readable, even for patients and the lay public concerned with the state of the evidence and art supporting CAM's role in prevention and management of illness and

well-being. This book provides educators with much necessary information needed to prepare coursework and learning activities. Although definitive data are lacking regarding efficacy and even safety of CAM methodologies, many chapters in this book summarize the existing evidence in a usable way. The topics analyzed range from well-accepted therapies, such as vitamin E for dementia and zinc tablets for the common cold, to far less conventional therapies such as transcendental meditation. The conclusions are often surprising, but well-presented and defended. Even the most highly controversial areas, such as the use of acupuncture to treat low back pain and osteoarthritis of the knee, are thoroughly and fairly reviewed. Finally, the chapters address some of the political issues that challenge CAM. These issues include who should be allowed to practice a CAM discipline whose efficacy is not based on the scientific method, and some of the state-to-state variations in practice standards and licensure.
